

2. Find the Search tool.
3. Type in "**Camera.**"

4. Drop the camera into the tool bar.
5. Press **E** again to close the **Inventory**.
6. With the camera in hand, right-click the word **Use** to take a 1st person snapshot of your screen.

7. With camera in hand, right-click the word **Place** to put the Camera into your world. Control the camera by pointing and right-clicking at an existing block.

8. After the camera has been placed, move the crosshair (+) to the camera.
9. Note: The right-side controls will change from the word, **Place**, to the words, **Take Picture**.

10. Right-click to **Take a Picture**. The camera will produce a Selfie.

**Learn:** *Taking a close up picture of an item on the ground with the camera. With camera in hand, **hold the Shift key while right-clicking**.*

[Learn: Portfolio](#)

**Learn:** *Where did all those captured pictures end up? The pictures taken with the camera are housed in the **Portfolio**, another great feature for assessment.*

The Portfolio not only holds captured pictures, but captions can be added to images. This is a great way to save a memorable moment.

**Tip:** Allow students to capture where they left off in their build for the day. Students can export photos they have taken during the day or week. The exported photos can be saved and used in other projects.

### Apply:

1. Press **E** on keyboard.
2. Find the Search tool.
3. Type in "**Portfolio**".

4. Drop into tool bar.
5. Press **E** again to exit the **Inventory**.
6. After returning to the game, select the portfolio from the hot bar.

7. The right-side menu will change to the word **Open**.

8. Right-click to bring up a two-page book of the photos taken in chronological order.

9. If appropriate, select the 'caption' place holders to add a short caption below each picture.

### Apply:

1. Select the **"Export Portfolio"** button.

2. The Export action creates a .pdf file with all your photos and captions.  
**SAVE** the Portfolio .pdf to a specific place where students and educators can retrieve the file.

3. The Portfolio will show up as a PDF. The PDF will display the World Name.  
This file will contain all the photos from that portfolio. See example below:
